March 1964

✓✓ WORLD COCOA BEAN CROP

EXCEEDS RECORD

RECEIVED

Summary

The second (February) estimate of the Foreign Agricultural Service for the 1963-64 world cocoa bean crop is 1,191,700 metric tons. This represents an increase of 2.9 percent over the previous season and exceeds the record 1960-61 outturn by over 26,000 tons. Larger crops are being harvested in Africa and South America, and in the Asia and Oceania region, while a slight reduction is being recorded in the North American outturn.

For 1964, world cocoa bean grindings are forecast at 1,230,000 tons, compared with 1,157,000 the previous year, or an increase of over 6 percent. The most significant increases are expected in Ghana, Brazil, USSR, and Japan. Only a small increase is forecast for the United States.

U.S. imports of cocoa beans during 1963 amounted to 286,328 tons, slightly below 1962 levels. Latin American producers supplied 41 percent and Africa 57 percent, compared with 27 and 72 percent, respectively, of U.S. imports a year earlier. New York spot "Accra" prices averaged 25.3 cents per pound during 1963, nearly 5 cents higher than in 1962. Average January 1964 prices were 25.7 cents, declining to 23.5 cents during February.

This circular contains more detailed information than the summary of similar title published in the World Agricultural Production and Trade Statistical Report of February 1964.

North America: The North American crop is placed at 87,200 tons, down from the 1962-63 harvest because of hurricane damage and heavy rains in the Caribbean area.

The Costa Rican crop is estimated to approximate that of the previous season. Exports during January-July 1963 totaled 4,560 tons, compared with 5,684 tons for the similar 1962 period. Exports to European markets and to the United States were larger, while Latin American sales were off sharply.

The crop in the Dominican Republic, the largest North American producer, will be slightly smaller this year. The United States usually accounts for nearly all of the Republic's cocoa exports. U.S. imports from the Dominican Republic during 1963 were as follows: 23,048 tons of cocoa beans; 4,555 tons of unsweetened chocolate; 308 tons of sweetened chocolate; 2,117 tons of cocoa butter; 3,057 tons of unsweetened cocoa powder and cake; and 117 tons of sweetened cocoa powder.

A smaller crop is being harvested in Haiti because of hurricane damage. As a result of increased handling costs in Haiti, higher cocoa freight rates to the United States will become effective March 15. The new rate will be 30 dollars per short ton, an increase of 3 dollars.

Mexico's production is not expected to reach the record 1962-63 level because of heavy rainfall and flooding in producing areas last fall. Low temperatures recorded during the latter part of December may adversely affect the summer crop outturn. A record 18,088 tons of cocoa beans was exported by Mexico during 1963.

South America: South American production will be nearly 8 percent above the 1962-63 harvest. Nearly all producers of this region are anticipating larger crops.

Brazilian production is estimated at 120,000 tons, compared with the 1962-63 outturn of 111,000 tons. The Bahia main crop (October 1963-April 1964) is placed at approximately 900,000 bags (54,000 tons). Rains during November and December have been favorable for the May-September Temporao crop, which is estimated at 1 million bags (60,000 tons). Production from other States is placed at 100,000 bags (6,000 tons).

A new area is being opened to cocoa in the "Reconcavo Bahiano" region near Salvador, Bahia. New plantings are being made exclusively with the "Catongo" or "white cocoa" variety, which has been shown to have a high resistance to pod-rot. This fungus disease causes losses of 20 to 25 percent annually to Brazilian production. The Bahia Cocoa Institute is negotiating with the Ministry of Agriculture for a program which would involve a Federal annual subsidy of 100 million cruzeiros for the promotion of "white" cocoa cultivation in this area.

Exports of cocoa beans during 1963 totaled 68,265 tons, 23 percent above those of the previous year. Shipments to the USSR were less than half those recorded in 1962, while exports to the United States nearly tripled. Exports to European markets were down sharply.

Colombia's crop is placed at 16,000 tons, 18 percent above the poor 1962-63 outturn. The Cacao Federation is planning to increase the area under cocoa cultivation by 40,000 acres within the next 5 years.

Production in Ecuador is expected to be larger this season. The anticipated outturn of 43,000 tons will be well above the 1955-60 average of 32,000 tons. Exports during 1963 totaled 35,323 tons, compared with 31,529 tons in 1962. Larger purchases were made by the United States, Italy, Colombia, and Japan.

Production in Venezuela is placed at 15,000 tons, slightly above the 1962-63 outturn. Exports during January-November 1963 totaled 11,549 tons, compared with the 12-month 1962 total of 10,913 tons. The United States was the largest market taking 52 percent, with most of the remainder going to the European Economic Community (EEC).

Africa: African production is at a record level this season. Bumper crops are being recorded in Nigeria, Cameroon, and Fernando Po, while harvests in Ghana and the Ivory Coast are slightly smaller. Prices paid to growers by the marketing boards for the 1963-64 season with comparisions are shown as follows:

COCOA PRODUCERS PRICES AND NEW YORK SPOT PRICES

Crop year	Ghana	Nigeria	Ivory Coast	Cameroon	Togo	Spot Accra
						1/
	-----	cents	per pound	2/	-----	
1956-57.....	18.0	18.7	16.7	15.5	18.7	27.2
1957-58.....	17.0	18.7	16.1	15.5	18.3	43.5
1958-59.....	17.0	18.7	16.5	13.9	18.3	38.0
1959-60.....	14.0	20.0	17.4	14.7	18.3	29.9
1960-61.....	14.0	20.0	17.4	14.7	17.4	23.5

1962-63.....	12.6	13.1	12.8	12.8	11.0	23.7
1963-64.....	12.6	13.7	3/ 12.8	13.8	11.9	4/ 25.7

1/ October-September average. 2/ Prices refer to Grade 1. main crop.

3/ Producer prices will be paid at the point of production instead of at Abidjan. This will result in an average increase of 1 to 2 cents per pound to the farmers, as previously the costs of internal transportation, handling, storage, and insurance were deducted from the fixed minimum. 4/ October - February average.

Cameroon's crop is estimated to be 9 percent above last season's outturn of 78,000 tons. Exports of cocoa beans during the first 9 months of 1963 amounted to 44,409 tons, down slightly from the January-September 1962 shipments of 47,364 tons. Exports to the EEC were higher, while shipments to the United States dropped sharply. The USSR has entered the Cameroon cocoa market, taking 51 tons during the 9-month 1963 period.

Another record crop is being harvested in Fernando Po and Rio Muni this season. Exports from Fernando Po during January-June 1963 amounted to 15,903 tons, and shipments from Rio Muni totaled 1,515 tons.

Production in Ghana, the world's largest producer, will be below that of the previous season. Output is estimated at 420,000 tons, compared with 428,800 tons the previous year. The main crop outturn of an estimated 391,000 tons (385,000 long tons), is larger than earlier anticipated. A portion of the main crop tonnage will probably be held over and included with mid-crop returns.

The Ghana Cocoa Marketing Board has purchased 51 percent of the shares of West African Mills Ltd., a cocoa processing plant located at Takoradi, from the British firm of Gill and Duffus Ltd. Under the purchase agreement, Gill and Duffus will continue to provide technical management for the plant, which produces cocoa butter, cocoa powder and other cocoa products.

Sales of cocoa beans by the Ghana Cocoa Marketing Company from the 1963-64 main crop through February 21, have totaled 320,738 long tons. A total of 90,435 tons to the EEC, 40,615 tons to the United Kingdom, 53,922 tons to the Sino-Soviet Bloc, 78,050 tons to the United States, and others 57,716 tons.

Exports of cocoa beans during the first 8 months of 1963 totaled 324,956 metric tons, nearly 36,000 tons short of the January-August 1962 shipments. Exports to the USSR and Eastern Europe amounted to 60,184 tons, exceeding total 1962 Bloc purchases of 48,681 tons. Shipments to the United States were smaller, 75,133 tons, compared with 103,470 tons a year earlier.

Ivory Coast production will be below that of the record 1962-63 outturn of 103,000 tons. Commercialization of the 1963-64 main crop through February 12 totaled approximately 82,000 tons, compared with 85,000 tons for the similar period in the previous season. Total 1963-64 production is expected to reach 95,000 tons. Exports during January-November 1963 amounted to 76,720 tons, slightly above the 11-month 1962 total of 72,225 tons. The EEC was the major market, accounting for three-fourths of the total, the United States taking most of the remainder.

The Nigerian crop purchases are expected to reach 205,000 tons, 15 percent above the previous year. However, an estimated 10,000 tons were held over from the 1962-63 crop and included in this year's purchases in order to receive the higher guaranteed price paid by the marketing boards this season.

Exports of cocoa beans during January-June 1963 totaled 120,307 tons, nearly 13,000 tons under the 6 month 1962 total. Larger shipments were made to most European markets, while exports to the United States and Canada were smaller.

Asia and Oceania: Output in Asia and Oceania is placed at 29,500 tons, 17 percent above 1962-63. Large crops in New Guinea are responsible for the increasing importance of cocoa in this region. Exports from New Guinea and Papua during 1963 amounted to a record 15,216 tons, nearly 19 percent higher than 1962 exports.

The Cocoa Producers Alliance (comprised of Ghana, Nigeria, Brazil, Ivory Coast, Cameroon, and Togo which together produce four-fifths of the world cocoa crop) met at Douala, Cameroon from January 27 through February 1, 1964. The members adopted a form of marketing agreement to become effective at the beginning of the 1964-65 harvest season and in addition will undertake measures to assure a satisfactory price level for producers. A meeting of the Technical Committee of the Alliance is scheduled to be held in London during May for the purpose of drafting an international agreement open to all cocoa-producing countries. Cocoa is an important commodity in the economy of the Alliance members as shown in the following table:

PERCENT FOREIGN EXCHANGE EARNINGS DERIVED FROM EXPORTS OF COCOA BEANS
AND SEMI-PROCESSED PRODUCTS FOR ALLIANCE MEMBERS, 1955-62
